Reviewed:	Revised:
11/21	1/22

Students who are required to take medication(s) during school hours must comply with the regulations established by the Tennessee Department of Health and Education. Over the counter medications are included in these regulations. The regulations are as follows:

- 1. Knox County Schools has the final decision-making authority with respect to the administration of and/or to reject requests for administering medications.
- 2. Written orders must be provided by a licensed health care provider. The order must include, student name, prescription number, name of the drug, dosage, frequency, route, and time administered, potential side effects, discontinuation date, and method of storage.
- 3. Medications administered at school should be limited to those required during school hours which are necessary to maintain the student's health and those needed in the event of an emergency.
- 4. Each medication requires a separate Medication Administration Form, signed by the prescribing health care provider and parent/guardian. The Medication Administration Form must be renewed yearly. Medication(s) changes during the school year require a new Medication Administration Form.
- 5. Medication(s) must be brought to the school by an adult. Students may not carry medications of any kind on their person with the exception of asthma inhalers, Epi-Pens (anaphylaxis medications), pancreatic enzymes or insulin delivery systems with written permission from a parent and authorization by a medical health care provider. Failure to properly register medication shall lead to a presumption that any such medication is not lawfully in the possession of the student.
- 6. Medications must be in appropriate containers, properly labeled by a licensed medical care provider or pharmacy. Over-the-counter (OTC) medication(s) prescribed for a student must be provided in its original unopened, labeled, unexpired container and identified student's written name.
- 7. If included in the student's medical management plan and in the Individualized Health Plan (IHP), a student with diabetes shall be permitted to perform blood glucose checks, administer insulin, treat hypoglycemia and hyperglycemia, and otherwise attend to the care and management of the student's diabetes in any area of the school or school grounds and at any school-related activity, and shall be permitted to possess on the student's person at all times all necessary diabetes monitoring and treatment supplies, including sharps. Any sharps involved in diabetes care shall be stored in a secure but accessible location, including the student's person, until use of the sharps is appropriate. Use and disposal of sharps shall be in compliance with the guidelines set forth by the Tennessee Occupational and Safety and Health Administration (TOSHA).

- 8. Upon receiving, the quantity of medication must be confirmed and documented by the school nurse or designated school employee and parent/guardian. A secure/locked location must be provided for medication storage.
- 9. All medications self-administered must contain the following documentation on the Medication Administration Record: time, date of administration, and signature of person administering. Medication records will be kept in the student's cumulative record when completed.
- 10. Only a school nurse can make changes to the Medication Administration Record. A written authorization from the licensed prescriber and parent is required.
- 11. School Nurses will monitor the administration, documentation, and storage of all medications on a regular basis. Only school nurses, trained school personnel, or a pictured-identified parent/guardian can administer medication(s) during school hours. A school nurse must train school personnel on medication administration yearly and as needed for reinforcement.
- 12. The parent/guardian is responsible for picking up any unused medication at the end of the treatment, out-of-date medication, or at the end of the school year. The parent/guardian will be notified to pick-up the medication. After notification attempts, if not picked-up in 14 days, the medication shall be destroyed per Knox County Schools procedures.
- 13. Medications must be destroyed by the school nurse or school administrator to include documentation and witnessed by at least one other school employee.
- 14. In the event a dosage is not administered as ordered or any other medication error occurs, a Medication Error Form must be completed and submitted to the Health Services Supervisor. The school nurse and parent or legal guardian must be notified.
- 15. If the medication is not time-critical (stat doses, one-time, loading doses, PRN medications) medications can be administered 30 minutes before or after the scheduled time.
- 16. Any person assisting in self-administration shall not be liable in any court of law for injury resulting from the reasonable and prudent assistance in the self-administration of such medication, if performed pursuant to the policies and guidelines developed by the Tennessee Departments of Health and Education and approved by applicable regulatory or governing boards or agencies.
