

IB CHEM HL Y2

Instructor: Elissa.Lapointe@knoxschools.org

SUMMER ASSIGNMENT:

-read and outline Chapter 10/20 in the textbook. (Speaking of textbooks, juniors in 2 year classes typically just keep theirs over the summer, so ignore any messages about text book collection for our class.) I've also attached a pdf of the chapter, in case you want easy digital access.

-include worked solutions in your outline

-do all blue problems (either in outline or at the end- but please label this on the cover or front page of your assignment.) Answers are attached. (Again, you have to EXPLAIN why multiple choice are correct... do NOT just state the letter. Also, this is exercise is to have a successful Y2... nothing is different from last year. *Just because I'm giving you the answers doesn't mean you shouldn't still be TRYING it first!!*)

-do all purple problems

-do nomenclature problems. (Chem.pdf)
