

GIVE Grant Middle School Saturday Clubs

SPRING 2023

Introduction to Game Development with Unity

Knox County: Magnolia Avenue Campus

Learn the basics of developing your own game using C# and the Unity game engine. Unity is a powerful and beginner-friendly game engine that is widely used for creating desktop, mobile, web, console and virtual reality games. No previous programming experience is required!

Web/Gaming Development

Blount County: Blount County Campus

Let's learn web/gaming development! You will come across terms like HTML, CSS and JavaScript. These are often called the building blocks of the web and some gaming consoles. Every library or tool seems to be centered around HTML, CSS and JS. So, if you want to become a web developer or gaming specialist programmer, you need to learn some basics to get started. You will learn the basics of what HTML, CSS and JavaScript are, how they make the web work and what they do on their own.

Let's do some custom projects and showcase your "mad" programming skills.

Time: 9 a.m-1 p.m.

Dates: February 4, March 4, April 1, May 6

Lunch Provided
