

### DO'S

Moisten a microfiber cloth with a mixture of 70% isopropyl alcohol and 30% water. The cloth should be damp, but not dripping wet. Excess moisture should be removed if the cloth is wet before wiping the product. Using any material other than a microfiber cloth could cause damage to your product.

### DON'TS

Other cleaning chemicals are very harsh and will damage surfaces. Avoid using any of the following chemicals or products containing these chemicals.

- **The cleaning solution provided by the county**
- Any chlorine-based cleaner, such as bleach
- Peroxides (including hydrogen peroxide)
- Solvents such as; acetone, paint thinner, benzene, methylene chloride or toluene
- Ammonia (i.e. Windex)
- Ethyl alcohol
