

First Grade Math

This packet includes four sections that cover the major content of 1st grade math. Each section includes multiple pages of notes and practice for each topic. For additional support, visit KCS TV on YouTube for instructional videos that accompany each section.

The following content is included in this packet:

Topic			
I. Geometry	II. Represent Addition and Subtraction Problems	III. Understand and Apply Properties of Operations and Relationship between Addition and Subtraction	IV. Understand and use Place Value to Add and Subtract
Identify shapes And attributes	Count on, count back	Add 3 digits	10 More, 10 Less
Draw shapes	Make 10	Fact Families	Understand Tens and Ones
Evaluate shapes			Add 2-digits to a 1-digit number

First Grade Summer Packet-Activities 3

Understand and apply properties of operations and relationships between addition and subtraction.

A.

Example

Which number bond shows $6 - 5$?

Look at the parts. Circle.

Example

B.

Which number bond shows $5 - 2$? Circle.

Read the Example. Then solve.

C.

Example

Write a subtraction sentence.

Then write an addition sentence.

1 Show Write a subtraction sentence.

Then write an addition sentence.

D.

Example Find $15 - 7$. Think: $7 = 2 + 5$.

Take away 2.

Take away 5.

$$15 - 5 = 10$$

$$10 - 2 = 8$$

$$15 - 7 = 8$$

E.

Look at the Example. Then solve.

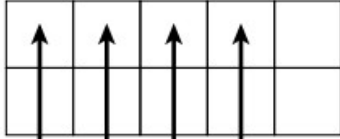

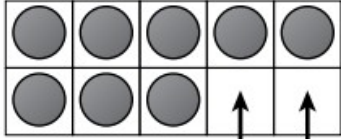

Example Find $14 - 8$.

$14 - 8 = ?$ is the same as $8 + ? = 14$.

$8 + \underline{2} = 10$

$10 + \underline{4} = 14$

$8 + \underline{6} = 14$ So $14 - 8 = 6$

Practice Problems

1.

Elton has 9 red blocks.

He has 6 green blocks and 4 yellow blocks.

How many blocks does Elton have?

$$9 + 6 + 4$$

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

2.

Jade has 5 shells. A friend gives her 5 shells.

Another friend gives her 4 shells. How many shells?

Find $5 + 5 + 4$.

$5 + 5 = \underline{\quad}$

$10 + \underline{\quad} = \underline{\quad}$

3.

Complete the number bond.

Write four number sentences.

A number bond diagram with a large box containing the number 9. Two smaller boxes are attached to the left side of the large box: the top one is empty, and the bottom one contains the number 4.

$\underline{\quad} + \underline{\quad} = 9$

$\underline{\quad} - \underline{\quad} = 4$

$9 = \underline{\quad} + \underline{\quad}$

$\underline{\quad} = 9 - \underline{\quad}$

4.

Use the rows of squares. Write ways to make 9.

$1 + \underline{\quad} = 9$ $8 + \underline{\quad} = 9$

$2 + \underline{\quad} = 9$ $7 + \underline{\quad} = 9$

$3 + \underline{\quad} = 9$ $6 + \underline{\quad} = 9$

$4 + \underline{\quad} = 9$ $5 + \underline{\quad} = 9$

5.

Reason There are 5 boxes. 2 are big.
The rest are small. How many are small?
Show how you solve.

Answers: (1.) 19 (2.) 14 shells (3.) $4+5=9$, $9-5=4$
 $9=5+4$, $4=9-5$ (4.) $1+8=9$ $8+1=9$, $2+7=9$, $7+2=9$,
 $3+6=9$, $6+3=9$, $4+5=9$, $5+4=9$ (5.) $5=2+3$, 3 boxes
are small.
